ABOUT

I am a web developer with design experience. I am currently fluent in React, JavaScript, jQuery, HTML, CSS and Sass. I find the middle ground of functionality, aesthetics, and user experience. As a believer in universal design, I pay attention to UX and accessibility as I code.

SKILLS

React
JavaScript
TypeScript
jQuery
AJAX, AXIOS (REST Api)
Firebase
CSS, SASS
HTML
Git, GitHub
Visual Studio Code
Responsive Design
Accessible Design
Adobe Photoshop
Adobe Illustrator

WORK EXPERIENCE

UI Engineer| Coates Group | 2021 - present

- Primarily worked with React, Redux, Sass, JavaScript. Occasionally used TypeScript
- Worked with design team to prototype and deliver time-sensitive projects for McDonald's Canada
- Brought new features to life from ideation to final product
- Trained new team members on JavaScript and CSS best practices and common debugging processes

Junior Web Developer| Coates Group | 2020 - 2021

- Worked extensively with Sass and React to map out dynamic content
- Used CSS to style captivating menu boards for McDonald's Canada
- Fetched data from internal database to be displayed on the menus
- Solved compatibility issues caused by required support of older browser versions
- Worked closely with QA, CMS, and Design team in an agile environment

Freelance | Che Patisserie | www.chepatisserie.com | 2021

- e-Commerce website designed and developed for small bakery selling weekly products
- Used mobile-first best practices to align with the usage patterns of majority end-users
- Integrated to pull data from Google Sheets to simplify content updates by non-technical client
- Leveraged EmailJS to send automated confirmation/invoice emails to customers
- Integrated Discord webhooks to send notifications to business when an order is complete

PROJECTS

PokeMatch| jQuery, Sass | LINK

- A game to match pairs of face down Pokemon cards
- Flexbox and media queries for responsive design
- Tabindex property to ensure accessibility
- Discovered the beauty of using BEM with Sass
