VINCCI TSUI
FRONTEND DEVELOPER

ABOUT
I am a web developer with design experience. I am currently work daily with React, JavaScript, Node, git, webpack, HTML and SASS. I am also currently learning TypeScript. I find the middle ground of functionality, aesthetics, and user experience. As a believer in universal design, I consider user experience and accessibility as I code.

WORK EXPERIENCE
Frontend Engineer | Coates Group | 2021 - present
- Primarily worked with React, Redux, Sass, JavaScript. Occasionally used TypeScript
- Brought new features to life from ideation to final product using tools such as React hooks, functional components and styled components
- Conducted weekly 1 on 1 knowledge share sessions with junior developers
- Trained new team members on JavaScript and CSS best practices and common debugging processes
- Worked with design team to prototype and deliver time-sensitive projects for McDonald's Canada

Junior Frontend Developer | Coates Group | 2020 - 2021
- Worked extensively with Sass and React to map out dynamic content
- Used CSS to style captivating menu boards for McDonald's Canada
- Fetched data from internal database to be displayed on the menus
- Solved compatibility issues caused by required support of older browser versions
- Worked closely with QA, CMS, and Design team in an agile environment

Freelance | Che Patisserie | www.chepatisserie.com | 2021
- e-Commerce website designed and developed for small bakery selling weekly products
- Used mobile-first best practices to align with the usage patterns of majority end-users
- Pulls data from Google Sheets to simplify content management for non-technical client
- Leveraged EmailJS to send automated confirmation/invoice emails to customers
- Integrated Discord webhooks to send notifications to business owner when an order is submitted

PROJECTS
PokeMatch| jQuery, Sass | vt1022.github.io/pokematch/
- A memory game to match pairs of face down Pokemon cards
- Flexbox and media queries for responsive design
- Tabindex property to ensure accessibility
- Built with BEM and Sass

SKILLS
React	Node
JavaScript	Firebase
TypeScript	CSS, SASS
jQuery	HTML
REST Api	VS Code
Webpack	Responsive
Git, GitHub, GitLab	Accessible
